## **Notification to All Hospitals Regarding County of San Diego Local Emergency Medical Services Information System (CoSD LEMSIS) 'Go Live' Information**

The County of San Diego, Emergency Medical Services (EMS) is continuing implementation of the next generation, integrated EMS information collection system. The new system is called the County of San Diego Local Emergency Medical Services Information System, or CoSD LEMSIS, which is replacing the current system QCS. The QCS System will no longer be available after June 30, 2017.

The CoSD LEMSIS Resource Bridge is the system element that provides information on hospital bypass and bed count status. Training of Emergency Department personnel by EMS Staff is scheduled for Tuesday, June 20 and Wednesday, June 21. The goal is for every hospital to start using CoSD LEMSIS Resource Bridge by June 28, 2017. This training is currently being finalized and information on how to register will be available very soon.

Base and Satellite hospitals are requested to contact their IT departments as soon as possible to make sure their hospital is prepared for the transition to the new system. CoSD LEMSIS is web-based program and requires an internet connection. The preferred web browser is Google Chrome.

If your IT department requires security forms or questionnaires, please contact Ellen Presente at 619.285.6530 to get the process started as soon as possible.

Thank you so much for your continued support of the EMS Delivery System in San Diego County.

Andrew Parr, EMS Administrator  
County of San Diego EMS
